

Customize any sweatshirt by adding letters or numbers to a sleeve. It is simple and easy with VELCRO® Sticky Back for Fabrics rectangles. Simply use a stencil to trace the letters or numbers and then cut them out. You can even run the VELCRO® materials and fabric through a die cut machine. It is really that easy!

Materials:

VELCRO® Sticky Back for Fabrics, rectangle, beige Fabric, ¼ yard or fat quarter Sweatshirt

Tools:

Iron, Westcott Brand Non-Stick scissors, stencils, vanishing fabric pen

Instructions:

1. Attach the hook and loop sides together and then cut a piece of the fabric the same size as the VELCRO® rectangles. Remove the release liner from the hook side and then press the fabric to the adhesive, making sure that the fabric is smooth.
2. Trace the letters or numbers with the vanishing fabric pen. Then, cut out the letters or numbers.
3. Before peeling the release liner from the VELCRO® rectangle, position each letter or number onto the sleeve of the sweatshirt so the letters are in the exact place you want them.
4. Attach the letters to the sweatshirt, making sure the adhesive from the rectangle is firmly attached to the sleeve.
